MR WONG TOO: “Yes, and that is the basis of calling the site exceptional. There is, however, something of a risk - if there is such a thing, that there is too much of a good thing and we are above the normal limits. This has not been a problem to date in New Zealand where they have - the turbine manufacturers have gained site specific certification because the wind speeds are outside the normal limits, but we are probably pushing the envelope on the outside here on this site.”
