Kia ora Mark

Thanks for meeting with us. I firmly believe most of the talking/negotiation should be done prior to lodging resource consents. We are always open to discussion whether there are differences of opinion, or not. However, I am left doubting MRP's integrity when Mike Omer said noise monitoring had been done in the cattle yards that are next to the road below our house. In my opinion these are devious tactics. I recall Rosemary asking Mike to do noise monitoring at our house as well as Huatau Marae last year. Mike claimed that he had no part in selecting the noise monitoring sites and I find I cannot accept this because the sites chosen required local knowledge. This does not engender trust. We would appreciate it if noise monitoring could be done at our house, at Huatau Marae and the writers retreat hut at the back of our property in order to provide a valid and fair representation of background noise. Furthermore this is to be arranged between Mr Hegley and myself so that no one else knows the dates it is being done at these sites, so that no additional noise generation takes place by sympathetic neighbours.

Regards
John Adams
