Hi Winston,

Here is an update on the Turitea wind farm fiasco. I have copied some links and headlines from

http://turiteadocuments.wordpress.com/turitea-wind-farm-documents/

This will help you to catch up on the latest developments. The complaint to the SFO, Police Commissioner and Office of the Ombudsman will land on their respective desks on Monday 7th. What has happened is unprecedented.

Surpringly to date you have not used any of the material provided either by myself or John Adams. Perhaps this is fortuitous as the latest development is the icing on the cake. This material would I believe provide you with a very useful diversion from the Horan debacle. If you are going to use it please confirm ASAP as to when and how, as of course we have a plan B.

John Adams has additional correspondence which he is willing to share with you. His contact details are

herman.adams@gmail.com ph 022 184 2014 or 06 3546200

A whistle blower provided details of Kenderdine's status and the government has since confirmed this. This correspondence has not been posted on the net.

Regards
Paul Stichbury
Hong Kong.

So here is the bombshell.

The Turitea Final Decision is illegal and corrupt. Kenderdine was fraudulently passing herself off as a judge when she had not held a warrant for 13 months before the the Final Decision was issued.

COMPLAINT OF FRAUD LODGED WITH THE SERIOUS FRAUD OFFICE 2 JANUARY 2013

A TISSUE OF LIES AND A FRAUDULENT TURITEA WIND FARM CONSENT – 2 JANUARY 2013

RESPONSE FROM THE GOVERNMENT 14 DECEMBER
A major development arising from the corrupt Turitea Final Decision. Mighty River Power must inform the investing public with specific detail that the Turitea and Puketoi wind farms are right on three of the country’s major fault lines. Turitea is on the Wellington and Northern Ohariu faults and Puketoi is right on the Wairarapa fault.
